## 2 Taking pictures/videos

### Taking panoramic pictures

Use panorama to "stitch" up to 3 pictures into a panoramic scene.

NOTE: For best results, use a tripod. Individual pictures are not saved, even if panorama capture is cancelled before stitching occurs. (Exposure Compensation, White Balance, Exposure Metering, AF Zone, AF Control, Color Mode, and Sharpness are set with the first picture. The flash is set to Off.) You can use the self-timer (2- and 10-second delays) while taking panoramic pictures. [Using the self-timer](#).

1. Turn the Mode dial to Panorama .
2. Press  to highlight Panorama Left-Right or Panorama Right-Left (depending on the direction you want to pan), then press OK.
3. Take the first picture.

*After a quickview, the LCD displays the liveview and an "overlay" from the first picture.*

4. Compose the second picture. Make the overlay from the first picture cover the same portion in the new picture.
5. If you are taking only 2 pictures, press OK to stitch them together.

*After you take 3 pictures, the pictures are automatically stitched together.*

### NOTE:

To capture the images directly off your camera, just plug in the USB cable into the camera and your computer. When you are in your RealBiz360 account you will now be able to select Upload Images, find the Camera Z1012 on your list and open it up. It will capture all the images from your camera and select which images apply to that listing and then upload.

You can also save these images after you have uploaded them with the Save feature found on your Manage Images selection.
